## DEPARTMENT OF PHYSICS

### Annual report of Add on course- **MATLAB Fundamentals-2014-15**

With a view to providing more expertise to students in computational techniques, Department of Physics decided to start an add on course on Matlab fundamentals. First board of studies meeting for the add on course was conducted on 08-08-2014 in the department and the board members decided to design a course structure on Matlab Programming. This course was supposed to be helpful for the students in doing their project works as well as pursuing a career in research. Dr. (Sr) Seena Mathew was appointed as the program co-ordinator and a syllabus and the structure of the course including the practical sessions were designed. It was decided to start the classes by middle of September 2014. Twenty students form BSc and MSc classes enrolled in the program. Dr. (Sr) Seena Mathew started the theory classes on 24-09-2014. First 10 theory classes were focused on the framework of MatLab, different tools in Matlab and small programs. Dr. Michael Augustine handled 20 hours of laboratory sessions. Training on data analysis, plotting of graphs, curve fitting and matrix methods was also included in the lab sessions.

## Annual report of Add on course- **MATLAB Fundamentals-2018-19**

First board of studies meeting for the add on course was conducted on 06-08-2018 in the department and the board members unanimously decided to design a course structure on Matlab Programming aiming towards improving students skills in computer programming and data analysis with the help of software. Dr. (Sr) Seena Mathew, the program co-ordinator for the year 2018-2019 designed the syllabus and the structure of the course thrusting on the practical sessions. The board of studies committee on 13-08-2018 approved the syllabus and the decided to start the classes by middle of October 2018.

Dr. (Sr) Seena Mathew started the theory classes on 24-10-2018 and the strength of the class was 38. First 10 theory classes were focused on the framework of MatLab, this include the introduction of different tools in Matlab and starting up with small programs. After the introduction next 10 classes were focusing on the plotting and data input in MatLab which was done by Dr. Geo Philip M. He extensively covered the portion of data analysis which includes data statistics and non-linear curve fitting. The course also touch upon the image analysis using MatLab which include introducing different image filters and smoothing techniques. The image analysis part stressed on the 3D image matrices and the colour filters. The course had a continuous evaluation based on regular assignments and exams. The final score of students includes the practical exam and a theory exam. Certificates were distributed to 18 students who successfully qualified the criteria.
